

#### **TCW BLEEDING FALLOUT REMOVER TDS & APPLICATION GUIDE**

Bleeding Iron Fallout Remover provides superior iron and fallout removal performance. The product works by capturing and dissolving oxidised iron particles, accompanied by a characteristic change in colour to a deep purple. It can be used as part of a deep clean process or regular wheel cleaner, and provides a very effective, yet mild, LSP safe, cleaning experience on all vehicle surfaces. The non-thickened formulations allows the product to quickly cover the entire surface to give a more rapid reaction.

#### **MAIN FEATURES**

- LSP Safe
- pH Neutral
- Turns purple with fallout

#### **APPLICATION & USE**

The product is intended to be applied using a spray and allowed a suitable contact time with the surface. Agitate with a an appropriate brush where needed. Where possible, surfaces should be pressure washed prior to use to remove any loose contamination. Best results will be achieved if a pressure washer is used for the subsequent rinse.

The product should not be allowed to dry on the surface so care should be taken in warm conditions including direct sunlight.

For heavy contamination repeat the process several times to ensure full decontamination.
