

TCW CERAMIC SHAMPOO TDS & APPLICATION GUIDE

Ceramic Shampoo is a highly concentrated pH neutral shampoo that is designed to clean and protect in a single step. The shampoo has high foaming, detergency, lubricity, and gloss enhancing, whilst also leaving behind a layer of hydrophobic polymers. These will protect previously untreated surfaces or maintain/enhance the performance of existing ceramic coating, wax, or sealant.

MAIN FEATURES

- Cleans and protects in one step
- Maintains and enhances paintwork protected with wax or sealant
- Highly dilutable for greater economy
- Pleasant fruity fragrance

APPLICATION & USE

Prior to extensive use, always test compatibility on an inconspicuous area of the surface. Rinse off loose dirt. Pour 25-45ml of Ceramic Shampoo into an empty 10L bucket and add water. We suggest using a bucket with a grit guard or rinsing the wash mitt in a clean bucket of water after each use, before dipping into the shampoo solution. Apply the shampoo by wash mitt, cleaning from the top and working downwards. For maximum protection, apply a small amount of neat product to the wash mitt. Do not allow to dry onto the surface. Rinse off with clean water and dry with microfibre drying towel.
