

TCW DURABLE TYRE SHINE TDS & APPLICATION GUIDE

Durable Tyre Shine is an extremely durable solvent based tyre gel dressing which is easy to apply and fast drying. One coat will provide a satin look or use multiple thin layers for a super high shine look that lasts up to 4+ weeks depending on weather conditions and usage.

MAIN FEATURES

- Long Lasting
- Satin or high shine finish
- Easy application
- Economical

APPLICATION & USE

This product is supplied ready to use. Ensure the tyre is thoroughly cleaned and dried. Using a sponge or similar applicator with the product apply a thin layer onto the tyres' surface. Ensure you are only coating the outside tyre wall and not the tyre tread. On narrow tyres, apply horizontally to make sure of this. Leave to dry for a short time. Apply more layers until desired effect is achieved. For best results, allow to fully cure for at least 2 hours. This will ensure no sling from the tyre shine to the bodywork or alloy wheels. Re-apply as and when required.

AVAILABLE SIZES
